

Key resources from 2009:

In July 2009, the California Department of Food and Agriculture released the [LBAM Draft Programmatic Environmental Impact Report](#)

.

In September 2009, the USDA's Animal and Plant Health Inspection Service released a report titled [APHIS Draft Response to Petitions for the Reclassification of Light Brown Apple Moth as a Non-Quarantine Pest](#) .

Also in September, the National Research Council release its [independent review](#) of the APHIS response.

Key timeline for 2008:□

I played an active, objective oversight role during the light brown apple moth controversy in recent years. Following are documents I received from the U.S. Department of Agriculture and the California Department of Food and Agriculture.

During hearings with USDA officials in early 2008, I posed a series of written questions. USDA sent answers to a portion of those questions on June 11, 2008. Those answers are available [here](#)

.

A letter responding to a request I made to to involve the U.S. Surgeon General and the U.S. Department of Health and Human Services is located [here](#) .

A response from the USDA's Animal and Plant Health Inspection Service that was included with the above letter is available [here](#) .
